Dr. John W. Sites
Dean for Research
Florida Agricultural Experiment Stations
1022 MCC
Campus

Dear John:

I have reviewed your proposal you delivered to me concerning the proposed transfer of the herbarium to the Museum.

In my opinion the conditions seem to provide a workable arrangement.

The problem of the TBA curator on our staff appears to be the only remaining blockade.

I suggest that we report our conclusions to Vice President Bryan and ask that he consult with Dr. York on possibility of providing the necessary man power to accomplish our recommendations.

Sincerely,

J. C. Dickinson, Jr.
Director
