

## PaleoClim Workshop Agenda

### Paleoclimatology, Paleoceanography, and Paleoenvironments Related to the Rise of the Isthmus of Panama and Closure of the Central American Seaway

November 1, 2012

Organized by PCP-PIRE and STRI  
University of Florida, Gainesville, FL

#### Workshop Objectives:

1. Define the critical issues related to the timing, climatic, oceanographic, and environmental effects associated with the rise of the Isthmus of Panama.
2. Identify existing gaps in understanding the timing and drivers of climate, ocean, and environmental change, as well as potential avenues to pursue in the future.
3. The promotion of scientific collaborations between PCP-PIRE, STRI, UF, and colleagues to address PCP-PIRE objectives for Panamanian geology.
