

How to Upload Your Flipgrid Video:

In addition to your Qualtrics application, we'd like to see your presentation style. You will need to film a 1-3 minute video of yourself explaining the following:

- Who are you? (Name/Title)
- What is your area of research?
- What is one interesting fact about yourself (unrelated to your science)
- Why should the public care about your research?

You will film and securely upload your video using Flipgrid. Here's how:

1. On your mobile phone or computer browser, navigate to <https://flipgrid.com/a6684ef5>.
2. Enter the password: ScienceonTap
3. Use the large green button with the plus sign to log in and film your video. You can use a personal Gmail account to log in with Google, or your ufl.edu account to log in with Microsoft.
4. Once logged-in, follow the prompts to film and submit your video. Once submitted, your video will only be visible to the Science on Tap PD instructor team, and not fellow applicants.
5. Have questions or need help? Contact Sadie Mills at smills@floridamuseum.ufl.edu.
